

Welcome to Coinbase Exchange

Coinbase Exchange helps a wide variety of institutional clients access one of the deepest pools of liquidity of any regulated crypto spot exchange through high throughput APIs and an advanced trading interface. Whether you are a market maker, high frequency trader, or institution, we've got you covered with our low latency, high throughput APIs.

The Complete Toolkit

Coinbase Exchange offers clients:

- The ability to connect via FIX and REST APIs, and our WebSocket feeds
- High frequency trading and capital efficiency
- Low cost of execution
- Competitive pricing with our dynamic, volume-based fee structure
 - Additional pricing incentives for liquidity providers
- Deposits and withdrawals in USD, EUR, or GBP

Deep Liquidity

Coinbase is one of the most liquid regulated crypto spot exchanges in the world. Leverage our dynamic fee structure to secure low cost of execution for your high-volume trading.

Pricing and Incentives

Coinbase Exchange offers competitive, volume-based price tiers for maker and taker orders. Extra discounts are provided through our Market Maker Program which rewards participants for adding to our already deep liquidity of hundreds of order books.

High Performance APIs

Get full control over your order and account management through our high performance, scalable FIX and REST APIs.

Additionally, you'll have continuous access to market data and order books via real-time WebSocket feeds.

Finding the Right Product

Our comparison of Coinbase Exchange and Coinbase Prime will help you select the best product for your institution:

coinbase EXCHANGE

- Focus on high throughput and low latency
- Coinbase-only liquidity
- Low cost, direct market access
- Perfect for market makers, high frequency traders, and other institutions that want direct access to our exchange

coinbase PRIME

- Focus on best execution
- Smart Order Routing technology to get you the lowest all-in price¹
- Advanced trading, custody, and prime services bundled into a single product
- Perfect for institutional investors, corporates, financial institutions, family offices, and high net worth individuals

¹Digital Assets may trade at different prices on different trading venues and trading venues not used by Coinbase may offer better prices than the trading venue used to execute your order. In directing orders algorithmically via its smart order router, Coinbase takes into account a wide range of execution factors that may differ on a trade-by-trade basis.
